

## R.A.M. MOUNTS

### RAM DESCRIPTION AND FEATURES

The Rugged ANVIS Mount (RAM) is designed and manufactured as a superior mount that provides a robust solution to address known problems with standard ANVIS mounts. The Rugged ANVIS Mount incorporates a stronger material, improved cable management and a more streamlined profile to ensure the mount will provide a rugged and secure base for the ANVIS NVG with less snagging or drag while providing the proper ANVIS mounting interface for flight helmets.

The major support components of the Rugged ANVIS Mount are machined from a stronger material instead of using thin injection molded pieces. As a result, the unit will withstand greater than 100 lbs of force on side impact, considerably more than most pilots or crew will require and more than 5(x) times of the standard mounts available. Also, the Rugged ANVIS Mount is designed with better cable management that routes all conductors through a single shielded cable until it enters the main support eliminating snag hazards and simplifying wiring. In addition, the routing mitigates the issue of wires pulling out of their contact points.

The Sidecar Rugged ANVIS Mount is designed to be utilized as a universal ANVIS mount. No more need for Sidecar Mount Adapters for the ALPHA Eagle/900 Series of flight helmets. The clearance of the sidecar Rugged ANVIS Mount enables end users to interface NVG to any commercial flight helmet.

#### Standard RAM

Attaches directly to the flight helmet or the helmet visor shroud using the 4-hole screw pattern or with stand-off pins in the ANVIS 4-pin quick-disconnect keyhole pattern.

Includes attaching hardware and pins.

Weight: 3.0 oz

Retail: \$625.00

### RUGGED LOW-PROFILE BATTERY PACK

Light weight and robust, uses four AA batteries (not included), no battery trays required.

Weight: 4 oz without batteries

Retail: \$485.00

#### RAM with Side Car Adapter

Attaches directly to flight helmet adaptor plate for use with Alpha Series helmets or with stand-off pins in the ANVIS 4-pin quick-disconnect adaptor with keyhole pattern.

Includes attaching hardware.

Weight: 3.5 oz

Retail: \$650.00

### GoPro MOUNTS

#### BALL AND PLUNGER Style Mount

Attach your GoPro camera with protective case to ANVIS Ball and Plunger style mount. Replaces ANVIS goggles when in use. Does NOT Include protective case.

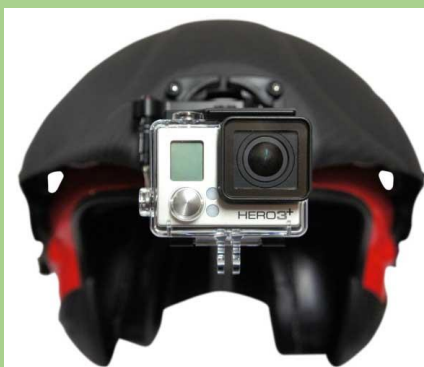

Weight: 3.0 oz  
Retail: \$175.00

#### ANVIS adaptable HELMET SHROUDS

Attach your GoPro camera with protective case to ANVIS adaptable helmet shrouds. Includes 4 permanent mount screws and 4 quick release studs. Replaces ANVIS goggles when not in use. Does Not Include protective case.

Weight: 2.5 oz  
Retail: \$175.00
